MI-SMALL

SUCTION BENCH FOR SPECIAL WORKS, MANUAL WORKS OR USING TOOLS WITHOUT SUCTION. VERTICAL CARTRIDGE FILTER TO COLLECT DUST IN THE REMOVABLE POCKETS WITH MANUAL OPENING. MANUAL START.

Suction bench for details production, the MI Small is suitable for manual cartridge works and for works abrasive tools, without their own suction. Very quiet engine, 72dB, with a rubber-coated flat surface anti-slip and scratch resistant.

Its standard dimensions, 100x100cm makes it the most requested and sold bench of its range. The T shaped design makes it a polyvalent product, allowing to work both seated, on the stool and standing. The installation on wheels allows to move the bench with the maximum of ease and move it where you think is necessary.

Like all our benches, also the MI Small version, is equipped with filters of a F9 class, perfects for sanding dust, but it is possible to build different types, H class for dusts dangerous for health, ATEX certified for potentially explosives dusts and/or even use some pre-filters for different needs, like paint and spray hood, or a metallic mail for a protection against sparks for grinding and deburring with abrasives.

MI-SMALL

It may be equipped with a contentive bulkhead to increase the suction prevalence and contain spatters or slags from works.

Suited to careful works, to finish delicate details but also for works in series of big production. The professional and clean line makes it perfect for every kind of environment, jewellers` workshops, dentals technicians, silk-screen printing and much more.
