FOR TOOLS**

Automatic starting with pneumatic tools. It is possible to start the central suction unit using the remote start selector on the panel.

PZP-MP

THE MULTIPURPOSE PANEL IS A PRODUCT USED AS A CONNECTION BETWEEN THE VACUUM-CLEANING CENTRAL UNIT AND THE OPERATIVE AREA. IT'S POSSIBLE FIT IT BETWEEN THE WALLS OF THE PREPARATION AREAS (1) OR USE IT AS A FREE-STANDING (2).

The PZP-MP model is suitable for two workstations, designed with two suction nozzles and with manual devices for the interception of suction, air sockets dedicated for the connection to the Stucchi central unit and to allow the automatic start of the machine.

It will be possible to activate the suction also through the selector AUTO/MAN (O/I) installed on the cover of the panel. It is equipped with nr. 1 compressed air socket, adjustable with a monitoring manometer.
